How to get Channel Founder

Superk - 2021-05-02 - Comments (0) - TeamSpeak

Channel Founder allows you to manage your channel through TeamSpeak. Channel founder is the same thing as "Channel Owner". You will be able to give Operator, Voice, or Half-Operator permissions, add sub-channels and modify your channel through TeamSpeak.
If you haven't received founder, or lost founder this will help you.

This is for Managed Channels only. If your channel is located under Private or Public please contact an Admin through TeamSpeak.

There are two ways to gain Channel Founder.

1. **Permission Key**
   1. Go to https://gamersarray.com/teamspeak-3/ or go to TeamSpeak > Channel Management on GamersArray
   2. Sign in if you already haven't

   3. Select your Primary Channel (if it's not already selected), then select your channel from the sub-channel list. If you select a sub-channel and not your primary channel you will only be granted permission for that channel.

4. Click Edit Channel at the bottom of the page

5. Click Permissions > Permission Keys

6. Click the Dropdown (beside Create Key) and click Founder. Then click Create Key

7. Your new key will show up below. You can click on the Red Copy icon, or copy

the key manually.

8. Log onto our TeamSpeak Server

9. Click Permissions > Use Privilege Key
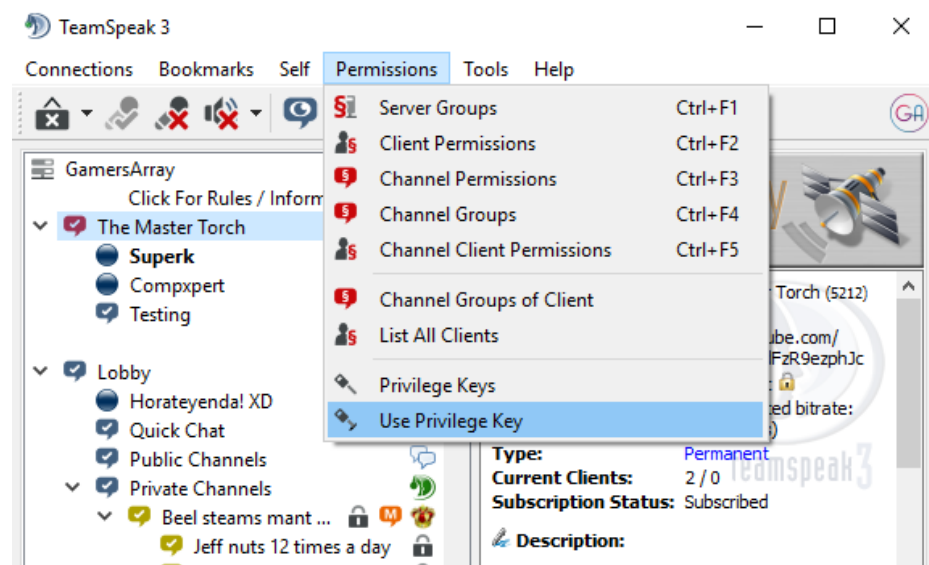

10. Paste the key you copied from step 7. Then click OK
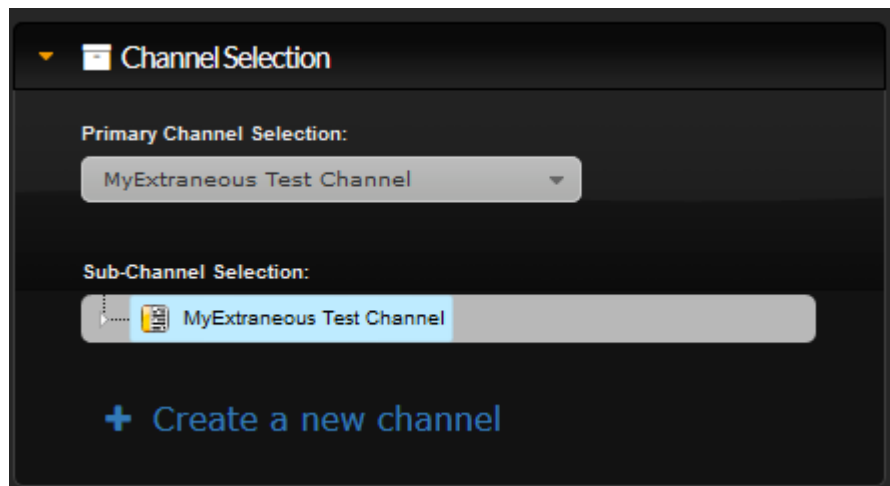

11. You should now have Channel Founder.

---

2. **Assign using GamersArray TeamSpeak Permissions**

3.

1. Go to https://gamersarray.com/teamspeak-3/ or go to TeamSpeak > Channel Management on GamersArray

2. Sign in if you already haven't

3. Select your Primary Channel (if it's not already selected), then select your channel from the sub-channel list. If you select a sub-channel and not your primary channel you will only be granted permission for that channel.
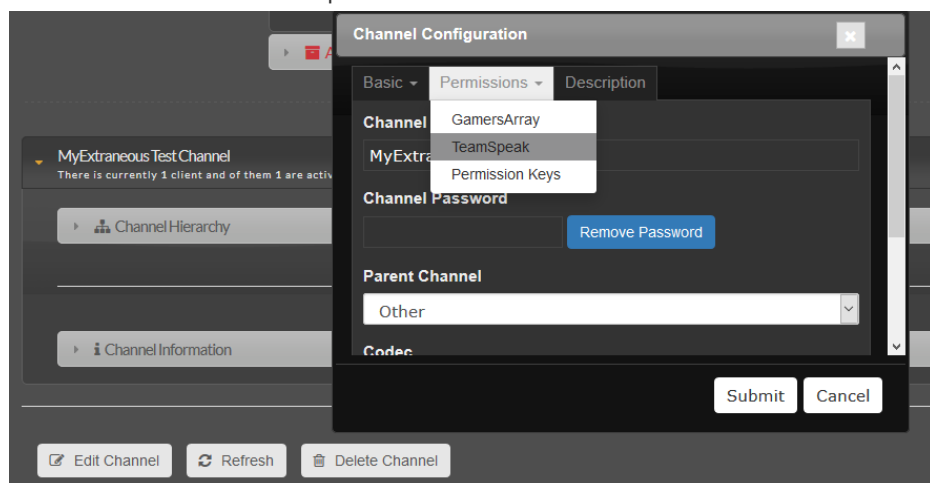

4. Click Edit Channel at the bottom of the page

5. Click Permissions > TeamSpeak
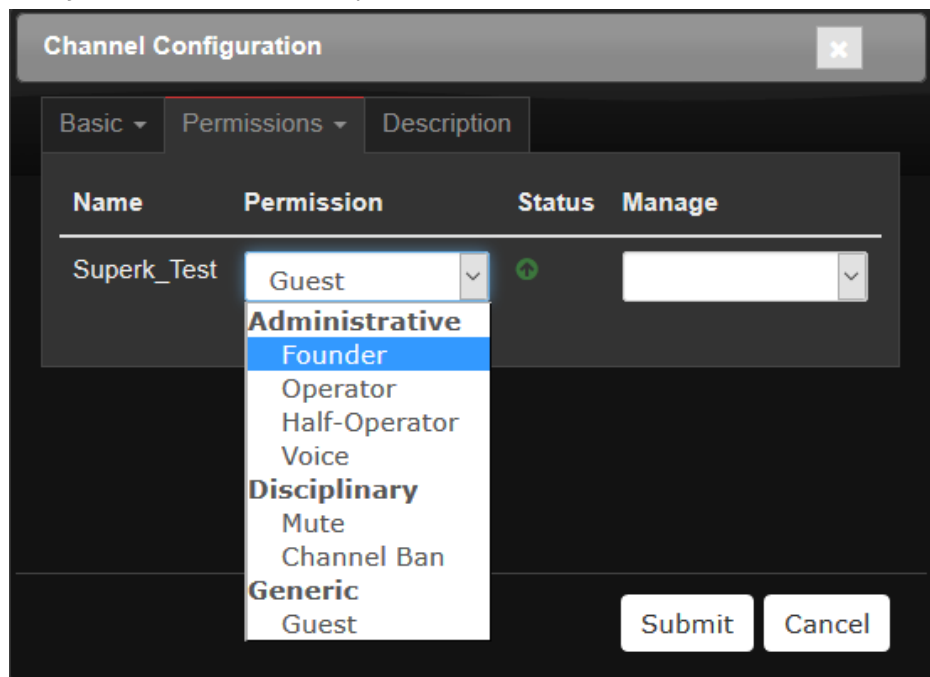

6. Find your name, click the Dropdown box and click Founder

7. Click Submit. You should now have Founder permission.
