How to create a channel

Tizzu - 2021-05-02 - Comentarios (0) - Website

To create a channel in our Teamspeak 3 server (voice.helpcomponline.com) you need to have a Gamersarray account. If you don't have one start at step 1, if you do have one start at step 2

1. Create a Gamersarray Account

a. Go to <https://gamersarray.com/profile/login/> and click on Register an account

b. Fill out the form with the required information and click on "Register".

TeamSpeak Info

Connection Issues - Resolved

I am aware of a connection issue currently happening with our TeamSpeak server. I have notified the host as I'm unable to remote in at all, nor am I able to restart the server. Current Status: Resolved - 3:03PM UTC (Due to a DoS attack on another server) Update: 2:54PM UTC - Restart has b...

TeamSpeak 3 Packet loss issues - Resolved

Some people have notified me that there's high packet loss occurring and that connection quality is bad. As I suspected a DoS I have enabled advanced DoS / DDoS protection and have turned on connection limiting. After doing some research network traffic is normal and there's no DoS/DDoS alerts. I have notified the host about [...]

TeamSpeak 3 Channel Management

March 27, 2016

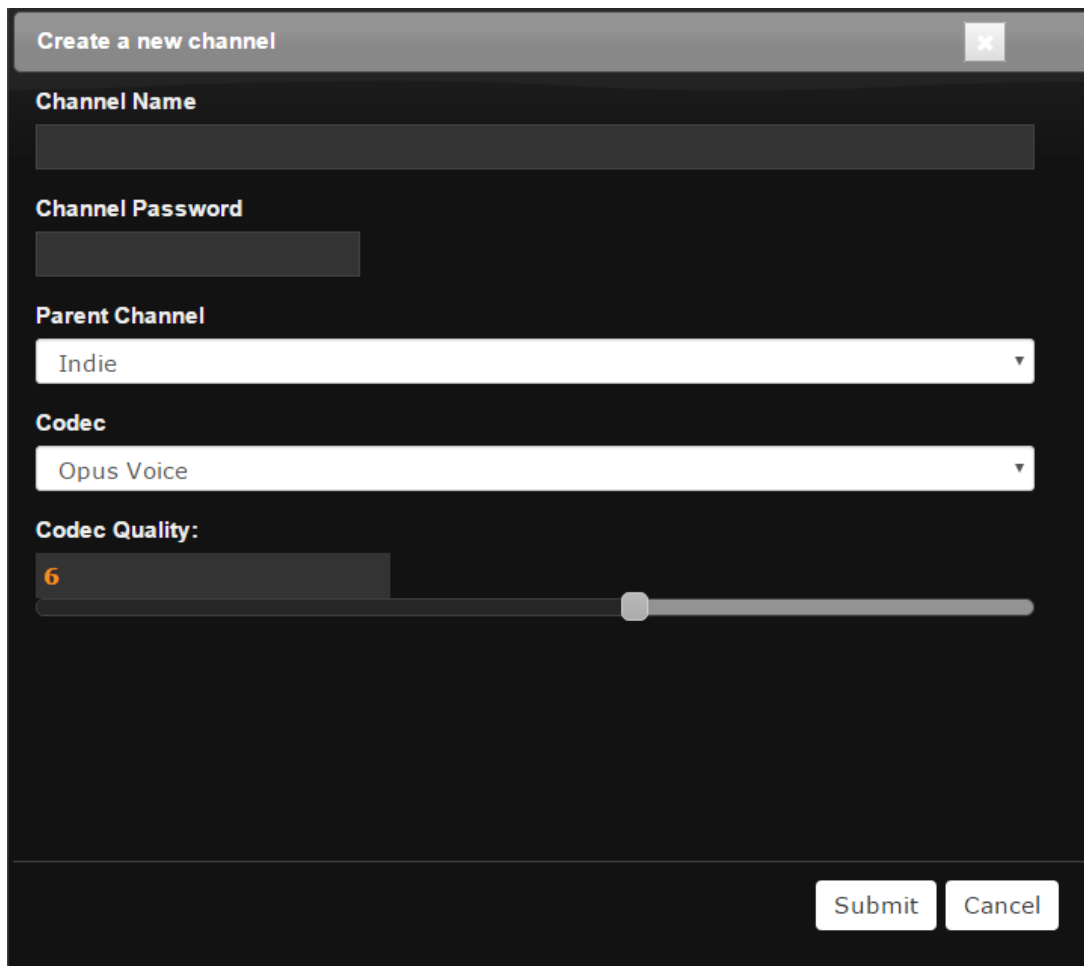

3. (if requested) Login to your account and repeat the step 2

4. Once you've logged in to your account you'll find a page like the following, click on Create a new Channel

5. If you didn't select a channel or you don't have any channels yet you will see a popup window like the following one

Create a new channel

Channel Name

Channel Password

Parent Channel

Indie

Codec

Opus Voice

Codec Quality:

6

Submit Cancel

Here you can set all the basic information you need in order to get started:

Channel name: the name of your channel;

Channel Password: the password you'll need in order to get access to your channel;

Parent Channel: Here you can choose in which group you would like to put your channel in;

Codec: Here you can choose which audio quality your channel will use; The higher the codec, the higher the bandwidth it'll use and the higher the audio quality it will give.

When it's all done Click on Submit, you'll receive a permission key. You will have to put this key inside your TeamSpeak Client (Open TeamSpeak 3 Client > Permissions > Use Privilege Key). Once done you will receive "Founder" permissions on your channel

Once done you can close the popup and you should see your new channel inside the "Primary Channel Selection" dropdown menu. If you can't see it refresh the page and it'll appear in that list.

That's it! Enjoy your new Channel!
