How to get Channel Founder

Superk - 2021-05-02 - Comentarios (0) - TeamSpeak

Channel Founder allows you to manage your channel through TeamSpeak. Channel founder is the same thing as "Channel Owner". You will be able to give Operator, Voice, or Half-Operator permissions, add sub-channels and modify your channel through TeamSpeak. If you haven't received founder, or lost founder this will help you.

This is for Managed Channels only. If your channel is located under Private or Public please contact an Admin through TeamSpeak.

There are two ways to gain Channel Founder.

1. **Permission Key**

1. Go to <https://gamersarray.com/teamspeak-3/> or go to TeamSpeak > Channel Management on GamersArray
2. Sign in if you already haven't

3. Select your Primary Channel (if it's not already selected), then select your channel from the sub-channel list. If you select a sub-channel and not your primary channel you will only be granted permission for that channel.

Channel Selection

Primary Channel Selection:
 MyExtraneous Test Channel

Sub-Channel Selection:
 MyExtraneous Test Channel

[+ Create a new channel](#)

- Click Edit Channel at the bottom of the page
- Click Permissions > Permission Keys

Channel Configuration

Basic | Permissions | Description

Channel: GamersArray
 MyExtra TeamSpeak
 Permission Keys

Channel Password: [Remove Password](#)

Parent Channel: Other

Code:

[Submit](#) [Cancel](#)

[Edit Channel](#) [Refresh](#) [Delete Channel](#)

- Click the Dropdown (beside Create Key) and click Founder. Then click Create Key

Channel Configuration

Basic | Permissions | Description

Founder [+ Create Key](#)

halfop	gvvNAcSDRDGHAfZ6Hc Delete	kyle

[Submit](#) [Cancel](#)

- Your new key will show up below. You can click on the Red Copy icon, or copy

the key manually.

8. Log onto our TeamSpeak Server
9. Click Permissions > Use Privilege Key

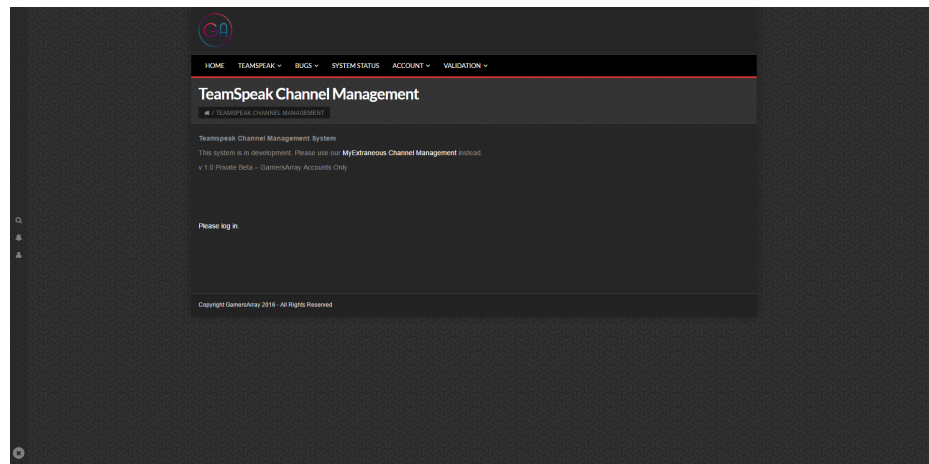

10. Paste the key you copied from step 7. Then click OK
11. You should now have Channel Founder.

2. Assign using GamersArray TeamSpeak Permissions

3.

1. Go to <https://gamersarray.com/teamspeak-3/> or go to TeamSpeak > Channel Management on GamersArray
2. Sign in if you already haven't

3. Select your Primary Channel (if it's not already selected), then select your channel from the sub-channel list. If you select a sub-channel and not your primary channel you will only be granted permission for that channel.

Channel Selection

Primary Channel Selection:

MyExtraneous Test Channel

Sub-Channel Selection:

MyExtraneous Test Channel

[+ Create a new channel](#)

4. Click Edit Channel at the bottom of the page
5. Click Permissions > TeamSpeak

Channel Configuration

Basic | **Permissions** | Description

Channel: GamersArray, TeamSpeak, MyExtraneous Test Channel, Permission Keys

Channel Password: [Field] [Remove Password]

Parent Channel: Other

Code: [Field]

[Submit] [Cancel]

Background interface shows: MyExtraneous Test Channel, Channel Hierarchy, Channel Information, Edit Channel, Refresh, Delete Channel.

6. Find your name, click the Dropdown box and click Founder

Channel Configuration

Basic | **Permissions** | Description

Name	Permission	Status	Manage
Superk_Test	Guest	🟢	[Dropdown]

Administrative

- Founder
- Operator
- Half-Operator
- Voice

Disciplinary

- Mute
- Channel Ban

Generic

- Guest

[Submit] [Cancel]

7. Click Submit. You should now have Founder permission.
