GamersArray Channel Permission

Superk - 2021-05-02 - Commenti (0) - Website

The GamersArray Channel Management System includes a permission system for founders to configure permissions for other people on GamersArray.

Types

Founder - This permission allows all. Founders can add/remove Founders, Operators, Half-Op and Voice. Founders can also delete channels. Founders can not remove the channel creators permissions, but can delete the channel - Giving this permission is your responsibility.

Operator - This group allows editing of channels and permissions. Operator can only add/remove View permission from GamersArray, and can only modify clients that are Voice or Half-Op in TeamSpeak. Operators can create and modify channels but can not delete channels.

View - This only allows people to view. This group is unable to modify, add, or remove anything.

* Permissions Inheritance is enabled. If someone has permission for one channel they will have permissions for all sub-channels part of that channel.

* In order for people to take advantage of this system, they will need a GamersArray account.

Add/Change/Remove Permissions

1. Select the channel which you wish to give someone permission.

2. Click Edit Channel

3. Click Permissions > GamersArray

Channel Configuration

Basic ▾ Permissions ▾ Description

Channel GamersArray
2 TeamSpeak
